- 跟踪 A 股与银行间债市联动规律，基于股债跷跷板效应判断 1 月债市调整逻辑。独立跟踪消费与制造两大板块估值体系，构建涵盖营收增速、毛利率、PE/PB 等核心指标的周度更新框架。在跟踪过程中发现某白酒龙头估值连续走低与行业基本面稳定形成背离，主动下钻至渠道库存数据，判断核心驱动因素为终端去库存预期升温而非基本面恶化，该观点被纳入团队周度市场回顾。
- 针对制造业板块，提出“新旧动能结构性分化”的分析框架：高端装备如工业机器人、半导体设备等，在政策催化下逆势扩产，而传统汽车及部分新能源制造环节产量同比收缩，两者估值走势显著分化。基于此框架撰写板块观点，为团队配置建议提供研究支撑。
- 整理上市公司公告、政策文件及调研纪要 80 余份，按“政策影响—业绩拐点—竞争格局”三维度提炼关键信息，提升团队研究效率。

INTERNSHIP

Guotai Haitong Securities Co., Ltd. , Asset Management Department, Intern

2026.1–2026.3

- Tracked A-share and interbank bond markets, identifying the stock-bond seesaw effect behind the bond market correction. Maintained a weekly framework for consumer and manufacturing sector valuations (covering revenue, gross margin, PE/PB). Found a leading liquor firm's valuation fell amid stable industry fundamentals, driven by channel destocking expectations; the insight was included in the team's weekly market review.
- Developed a "structural divergence between old and new growth drivers" analytical framework for the manufacturing sector: high-end equipment (industrial robotics, semiconductor equipment) expanded against the trend under policy tailwinds, while traditional auto and select new energy segments contracted YoY, with valuations diverging accordingly. Authored sector commentary based on this framework to support the team's allocation recommendations.
- Organized 80+ corporate announcements, policy documents and research notes; distilled key information along three dimensions — policy impact, earnings inflection points and competitive landscape shifts — and improved the team's research retrieval efficiency.

Guoxin Securities Co., Ltd., Investment Banking Department, Intern

2025.6–2025.8

- Participated deeply in an IPO project for a new energy automation equipment firm. Amid recovering industrial automation demand and renewed lithium battery capacity expansion in H1 2025, I analyzed three years of financial reports and identified the company's strengths: above-industry revenue growth and better accounts receivable turnover.
- Systematically analyzed the target company's financials and identified potential risks, including low gross margin due to standard product mix and slow inventory turnover from proactive stockpiling. Contributed to a 10+ page financial analysis report, providing guidance for the project team's due diligence.
- Independently handled the issuance, verification and filing of nearly 200 supplier/customer confirmation letters, and used DeepSeek AI to identify nearly 20 information discrepancies. For a major supplier's inconsistent reply, I traced related contracts and receipts, confirmed it as a timing difference, and provided key evidence for audit due diligence.
